

FINGER PROTECTION SAFETY PANEL

These are panels with a special form produced in accordance with EN 12604 standards.

Thanks to this form, it is ensured that hands or foreign objects do not enter the joints of the panels.

This feature eliminates possible accidents.

Physical Technical Specifications

Polyurethane Density: $d = 40$ (ISO 845)

Thermal insulation: $k = 0.45$

Wind resistance: 1400 Pa

Fire Resistance: Fire Resistance Class

2(DIN 4102)

Sound Insulation Value: $R_w = 26$ db

Panel weight: 12 kg

The panels are suitable for outdoor conditions and are not affected by climatic conditions.
